- **Tools & Delivery** – Version Control (Git/GitHub), Azure DevOps, Agile/Scrum, Business Process Automation, Deployment support, Technical architecture and solution design, full cycle software delivery

CERTIFICATIONS

PL-900 – Microsoft Certified: Power Platform Fundamentals
PL-100 – Microsoft Certified: Power Platform App Maker Associate
PL-200 – Microsoft Certified: Power Platform Functional Consultant Associate

SELECTED PROJECTS

HR, Finance, Sales AI Agentic System
React.js, Python, Azure, Microsoft Foundary

- Develop Agentic AI Automation system for HR, Finance and Sales processes for organization workflow connected with Dynamic 365.
- Design and develop front end applications using React for all HR, Finance and Sales AI Agentic systems.
- Integrated with Backend & develop the necessary orchestrations for central hub for agent to agent communication.
- **Role: Developer**

Tasting Application – Lion Brewery
Power Apps, SharePoint, Power Automate

- Developed a quality evaluation platform for beverages tasting sessions making 90% of workflow productive.
- Implemented session management, sample evaluations and flavor scoring mechanisms.
- Generated PDF and Excel report for management reporting.
- Built master data management and administrative functionalities
- Build the application using modern UI techniques.
- **Role: Team Leader, Developer**

Attendance Plan Application – Orel IT- Internal projects
Power Apps, SharePoint, Power Automate

- Developed an employee attendance and seat booking system for hybrid working environments making the workflow 80% productive and automate.
- Implemented office seat reservations through an interactive office map.
- Build attendance approval workflows for managers and HR teams.
- Integrated attendance reporting capabilities with HR systems.
- Designed the solution to support future fingerprint machine integration.
- **Role: Team Leader, Developer**

Azure DevOps Power BI Dashboard – Orel IT- Internal projects
Power BI, Azure DevOps

- Designed and developed interactive dashboards for project and employee performance tracking.
- Created reports using Azure DevOps Analytics OData feeds.
- Developed visualizations for project status, work item tracking, and team productivity metrics.
- **Role: Team Leader, Developer**
